Type	Sheets	Frame
1-#	Tata Dura shine Pre Coated Sheets	ER Heavy Duty
2-#	Fibre	1.1mm thick
3	GI Sheets	1.2mm
4-#	Poly Carbonate	1.1 mm

The roofs made from M. S. steel are economical and offer best solution for your temporary structures for terrace and gardens.

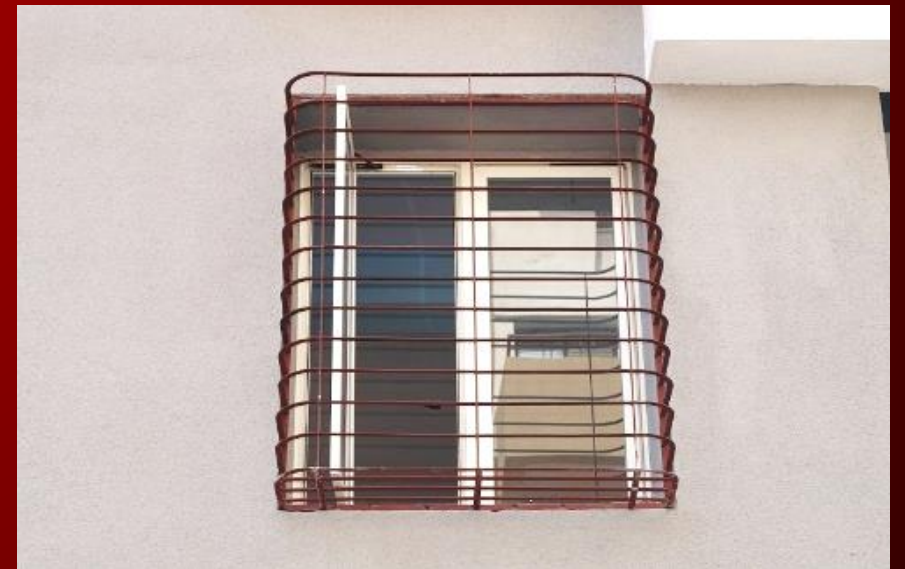

Ms roofs, roof sidings and sheds made by us are very strong as we use ERW (ERW stands for Electric Resistance

welded pipe. A plate rolled to become a pipe using Electric Resistance Welding process.) pipes made in imported machines from coil sheets which enables seamless surface and imparting great strength unlike normal pipes these are heavier and thicker to withstand wind pressure at great heights.

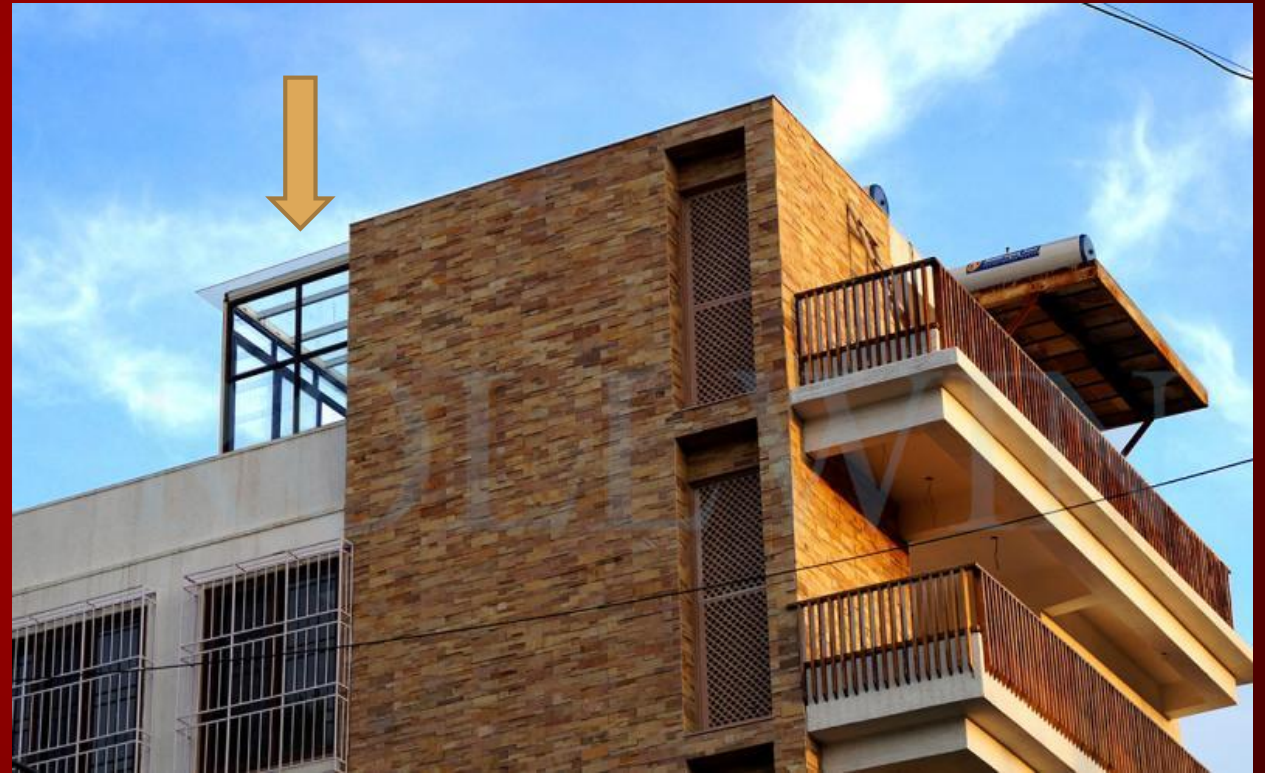

# GRILLES:

- Grilles are basic requirement to protect our families from intruders & so should be strong and sturdy
- Our grilles are made from better quality steel and welding rods to withstand blows and corrosion with excellent finish.

# GLASS SHEDS:

Glass Sheds are made in 8 mm to 12 mm toughened glass on strong ms supports

## ROLLWIN ALUMINIUM
